Biography

- **Elizabeth Mary Palmer [Lykes]**, daughter of Cora Margaret Palmer, was born 14 Oct 1913 at Metropolitan Hospital in Manhattan NY, and died in Feb 1974 in Rocky Point, Suffolk, NY at age 60 due to lung cancer.

Aliases

- Variant given names: As an adult, she was known as "Betty", though she reportedly had the nickname "Girlie" in her teen years.
- Variant surnames: Used the surname "Lykes" as a young adult,

but paternity was elsewhere (see below).

- Married twice, first to Edward Brodeur, then to Henry McInerny.

Birth

- Elizabeth was baptized on 19 Oct 1913 in New York at Metropolitan Hospital on "Blackwell's Island", now known as Roosevelt Island. (Metropolitan Hospital was moved to its current location in East Harlem in the 1950's.) [1] Her parents are listed in the baptismal record as "*Wm and Cora Palmer*", though it is unclear who was "*Wm*". [2] Being born to her mother under her maiden name indicates an out-of-wedlock birth. (See the image.) The 1943 reissue of Elizabeth's birth certificate is in the name 'Elizabeth Palmer,' making it unlikely that she was legally adopted as an child by her step-father George J Lykes, which would have been reflected in a name-change on the certificate.

Metropolitan Hospital, Blackwell's Island, c. 1900

- Since Elizabeth and her step-grandmother Bertha Staub Palmer Knuble were quite close as adults, we may conjecture that Bertha had a hand in protecting/raising Elizabeth at this point in her life.
- Elizabeth's maternal grandfather was Henry S Palmer (Sep 1861 NY - 16 Feb 1924 Jamaica, Queens, NY). Henry's three children were born of his first marriage to Isabella Liddell (1860-1901): Charles Palmer (1889-1968), Cora Margaret Palmer (1895-1956), and Harry Albert Palmer Sr (1899-1934). Following the untimely death of his first wife, Henry remarried to Bertha Staub Palmer Knuble (1876-1953) on 10 Sep 1901 (Maspeth, Queens, NY). Henry's children were raised by their step-mother Bertha. Isabella had a daughter, Florence Baird Collins (b. 1878),

from her first marriage to James B. Baird (1856-1921).

- Elizabeth's mother, Cora Margaret Palmer subsequently married George J Lykes Jr (1889–1918) on 12 Mar 1915 in Bronx NY. George and Cora Margaret had two children together, George Lykes 3rd (3 May 1916 Bronx NY - 19 Apr 1990 Bronx NY), and Harriet Lykes Pade (1918-1995).
- George J Lykes Jr died untimely in the Bronx on 17 Oct 1918, a casualty of the Spanish Flu epidemic. His son, George Lykes 3rd was raised by his paternal grandparents, George Lykes Sr & Julia Pressner. This is a second period where her step-grandmother Bertha may have had a hand in raising Elizabeth as well. Harriet was adopted as an infant.
- Elizabeth's mother, Cora Margaret Palmer promptly remarried to (or began cohabiting with) William Francis Haggerty Sr (b. 1884) by early 1919. Their son (Elizabeth's half-brother) William Francis Haggerty Jr was born in Nov 1919.

Paternity

- Cora "Margaret" Palmer (1895-1956) was 18 when she gave birth to her first child **Elizabeth** out of wedlock in New York City in 1913. Margaret married her first husband George Lykes in Mar 1915.
- Although Elizabeth listed George Lykes (1889-1918) as her father on several documents,[3] the DNA evidence is not consistent with this. All the identified second-cousin descendant matches are at the "half second cousin" level, for example:

Match	DB cM/ segs	RCC cM/ segs	Predicted Relationship
KPB	111 / 8	41 / 5	½-2C by Geo J Lykes (1916-1990)
DEL	132 / 7	129 / 4	½-2C by Geo J Lykes (1916-1990)
JAC	181 / 13	110 / 4	½-1C1R by Harriet Lykes Pade

RH2	136 / 8	129 / 5	½-2C by by Wm F Haggerty Jr

- DB and RCC (grandchildren of Elizabeth Palmer) fail to match several direct descendants of George Lykes' parents.
- It is possible Elizabeth listed George Lykes as her father out of sentimentality, because of their brief step-parent relationship.
- Elizabeth's biological father is **not** likely to be either of her mother Margaret's two husbands, George James Lykes Jr, or William Francis Haggerty Sr.

- A common-match **cluster** of at least 21 Ancestry DNA test-takers have matches to two of Elizabeth's grandchildren, DB and/or RCC, first cousins. These clustered matches have no common matches with "Brodeur" (Elizabeth's husband), "Lykes" (Margaret's first husband) or "Haggerty" (Margaret's second husband). This narrows down the cluster to Elizabeth's unknown father.
- Representative cluster matches as of Dec-2022 include:

Cluster Match	DB	RCC	A Significant Ancestor
CM	39 / 1	36 / 2	Edna A Kennedy
MMA	31 / 2	30 / 2	Edna A Kennedy
JK	52 / 3	0	James Hanna Kennedy
KKA	49 / 1	33 / 2	James Hanna Kennedy
SS	19 / 2	0	James Hanna Kennedy
VAWP	56 / 4	18 / 1	Eleanor Gibson Kennedy
CH	41 / 3	18 / 2	William James Kennedy
DRR	23 / 3	0	William James Kennedy

- The clustered matches have in common the Kennedy family in America, composed of a number of immigrant *Ulster-Scots* from

County Down, Ireland to New York City.

- DB and/or RCC match descendents of four of the seven children of David Kennedy Sr and Eleanor Arbuthnot. This leads to the hypothesis that Elizabeth's bio-father is among their three sons.
- DNA matches to descendants of Arbuthnot (FLBG and KLC) also make this family most likely, since their mother was an Arbuthnot. The three likely men are:
  - William James Kennedy Sr (28 Oct 1877 - 1961). Married 1914. One son and one daughter.
  - James Hanna Kennedy (21 Dec 1882 - 15 Aug 1932). He is considered least likely, since he moved from NYC to New Orleans before Elizabeth was born: married 1910 in New Orleans; lived in Dallas TX 1911-1918.
  - David Gibson Kennedy Jr (26 May 1890 - Sep 1957). Their is no record of legitimate children from DGK.
- This hypothesis takes into account the common ancestors of the DNA **cluster** matches, as well as the time and place of Elizabeth's birth. Resolving this question required identifying more (and larger) cluster matches, and sorting out the amount of their matches to each other and Elizabeth's known descendants.
- Other formal possiblities to be dealt with:
  - William D Kennedy (1889-1940): DB only matches his granddaughter VAWP at 56 cM; not consistent with a ½-1C1R. DNA matches to his descendants may be inordinately high, as he married his first cousin.
  - Harry Gibson Kennedy (1893 - 1963), who had at least two sons and five grandchildren. DB has no matches to his descendants. If a match turns up, it can be assessed then.
  - Walter Hugh Herbert Kennedy (1889-1957): DB matches his great-granddaughter 'stormy betsy' at only 20 cM, making a ½-2C relationship very unlikely.
- Since DGK had no other known children, distinguishing between the two most likely possiblities required adequate DNA matches among WJK's descendants.
- The match between DB and DRR is **not** consistent with the ½-first cousin once removed relationship that would result if

William J Kennedy Sr were the father of **Elizabeth Palmer**.[4] This confirms that Elizabeth's father was David G Kennedy Jr.

Marriage & Children

- Elizabeth married Edward M Brodeur 21 Nov 1932 (civil ceremony) in Bronx, NY. Edward was born 1906 in West Warren, Worcester, Massachusetts, and died suddenly in 1954 in Tewksbury, Massachusetts about age 48.
  - Civil ceremony at Bronx Borough Hall by a City Clerk on 21 Nov 1932.
  - Church wedding at Our Lady of Mercy, Bronx NY, on 22 Jan 1933.
  - The bride was 19, not 22 as stated. The groom's parents are misstated on both licenses, and his name is reported as Edwin, rather than Edward. (See the images.)
  - This was Edward's second marriage, after Cecelia Dubord.[5]
- The couple had three children who lived to adulthood, all born in Bronx, NY:
  - Joan L Brodeur (1933-1995)
  - Ronald J Brodeur (1937-1998)
  - Owen A Brodeur (1938-2005).
- An additional child died in infancy: Robert Brodier (sic), b. 7 Apr 1932, d. 18 Dec 1932, age 8/12, in Bronx NY. Mother Elizabeth Lykes, Father Edwin Brodier. Reg. No. 10153. Buried 19 Dec 1932 at St. Raymond"s.[6]
- Elizabeth's second marriage was to Henry Joseph McInerny on 19 Nov 1963 in Brooklyn, NY. The ceremony was witnessed by Robert P Cassidy and Joan Brodeur Cassidy. Henry was born 4 Jul 1887 in Worcester MA, and died in Jun 1965 in Barre, Worcester, MA at age 77. This was Henry's second marriage as well. There were no children of this marriage between Elizabeth and Henry.

- 1965 (Jun) Death of her husband Henry J McInerny, at their home in Barre MA
- 1968 (Nov) Death of her uncle, Charles Palmer, at 10 Seba Ave, Brooklyn NY. Elizabeth inherited his home, which had originally belonged to Bertha Palmer Knuble.
- 1974 (Feb) Death of Elizabeth McInerny, of small-cell lung cancer; last residence Rocky Point (Brookhaven), Suffolk, New York
- Elizabeth was cremated, and her ashes were scattered over the rosebushes at her last home in Barre, Massachusetts.

DNA

- Maternal relationship is confirmed by a triangulated group consisting of David Brodeur and RCC, first cousins, and Jason Henderson, their third cousin, sharing a 25.0 cM segment on chromosome 11 from 123.0M to 134.4M. The most recent common ancestors of the triangulated group are Henry S Palmer & Isabella Liddell.
- Paternal relationship confirmed by an Ancestry DNA match (41 cM across 3 segments) between CH and DB, third cousins. Their MRCA are David Kennedy Sr and Eleanor Arbuthnot, CH by their son Willliam J Kennedy Sr, and DB by their son David G Kennedy

Jr.

- Paternal relationship confirmed by a 23andMe DNA match (63 cM in a single segment on chromosome 1; 0.84%) between DB and KKA, third cousins. Their MRCA are David Kennedy Sr and Eleanor Arbuthnot, DB by their son David G Kennedy Jr, and KKA by their son John Hanna Kennedy.
- Paternal relationship confirmed by an Ancestry DNA match (56 cM across 4 segments) between DB and VAWP, second cousins once removed. Their MRCA are David Kennedy Sr and Eleanor Arbuthnot, DB by their son David G Kennedy Jr, and VAWP by their daughter Eleanor.
- Paternal relationship confirmed by an Ancestry DNA match (52 cM across 3 segments) between DB and JAK, second cousins once removed. Their MRCA are David Kennedy Sr and Eleanor Arbuthnot, DB by their son David G Kennedy Jr, and JAK by their son John (James) Hanna Kennedy.
- Paternal relationship confirmed by an Ancestry DNA match (39 cM across 1 segment) between DB and CMM, second cousins once removed. Their MRCA are David Kennedy Sr and Eleanor Arbuthnot, DB by their son David G Kennedy Jr, and CMM by their daughter Edna.
- Paternal relationship confirmed by an Ancestry DNA match (23 cM across 3 segments) between DB and DRR, second cousins once removed. Their MRCA are David Kennedy Sr and Eleanor Arbuthnot, DB by their son David G Kennedy Jr, and DRR by their son William J Kennedy Sr
    - Incidentally this match is NOT consistent with the ½-first cousin once removed relationship that would result if William J Kennedy Sr were the father of **Elizabeth Palmer**.[4] This confirms that Elizabeth's father was David G Kennedy Jr.

Research Notes

- More than fifty years have now elapsed since Elizabeth's death on Long Island in Feb 1974. It should be possible soon to find her information in the New York State Death Index:

- Assembling proper documentation to obtain New York State death certificate. Town of Brookhaven denies having any record. It's possible she died at St Charles Hospital in the Village of Port Jefferson.
- A new application for a death certificate was filed 18 Mar 2024 with NY State Dept of Health: public record for a death > 50 yrs ago.
- With an original death certificate, we may be able to obtain the original birth record from New York City.
